Crypto Savvy Life

Crypto Record Sheets

Guidance Notes:

We can't stress enough how important it is ***NOT*** to store any important information about crypto on your computer or your phone or in the cloud or anywhere else that a hacker can get to it. **If it is digital they can hack it!**

Passwords

- Minimum 16 characters
- Don't simply spell words or sentences backwards
- Don't replace letters with numbers that look similar
- Don't ever use the same password on more than one account.

Example:
Make up a random sentence and then create a rule to keep, remove or substitute letters from each word and lastly remove all the spaces.

For example keeping only the first two letters of every word from this sentence:

'Why do apples taste better when they are chilled'

gives you :

Whdoaptabewhtharch

Security Questions

If any accounts require a security question, you need to create a long, **fake answer** that has nothing to do with the question.

Pets names, school names, mothers maiden name, first car…..all of this stuff can be discovered online!

Mothers Maiden name becomes **Windleafblew**

First Pet Name becomes **Orangeballoonbasket**
